

#### **PROSA**

Is a banking terminal management company with a large presence in Mexico and in some places in Latin America.

Project: Generation of biometric IDs for user authentication, management and administration of bank accounts as well as payments at different points of sale where Prosa group banking terminals are accepted.

Objective: Creation of prototype for biometric authentication and its relationship with data collection through Blockchain.

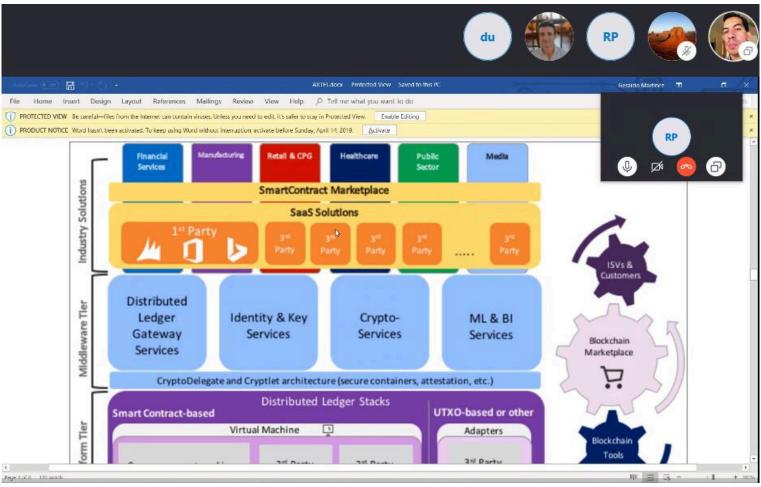

Scope: Today they are one of the leaders in the financial industry in the processing of electronic transactions in Mexico and we are among the top 10 in Latin America by processing more than 4.4 billion annual transactions on our Switch.

### Approach to the project:

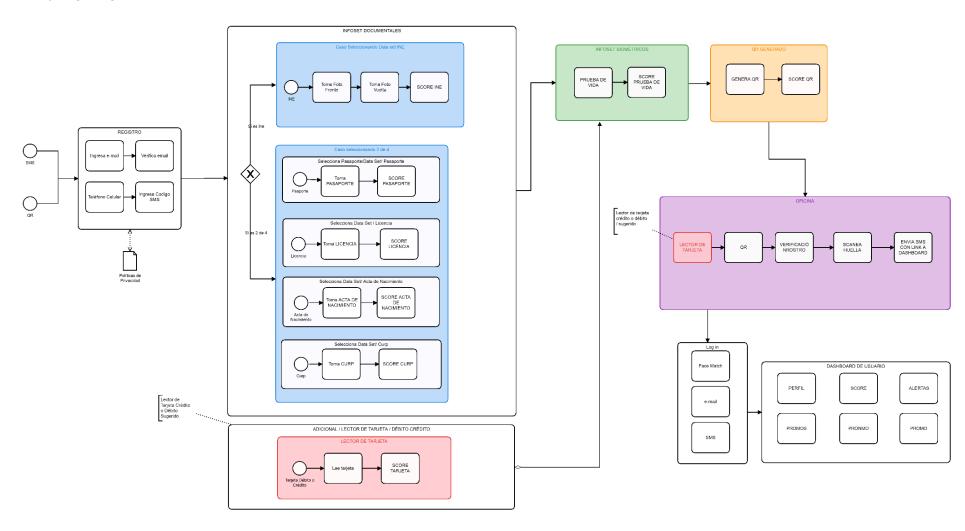

Product and User Product Research:

Look for similar apps or products on the market.

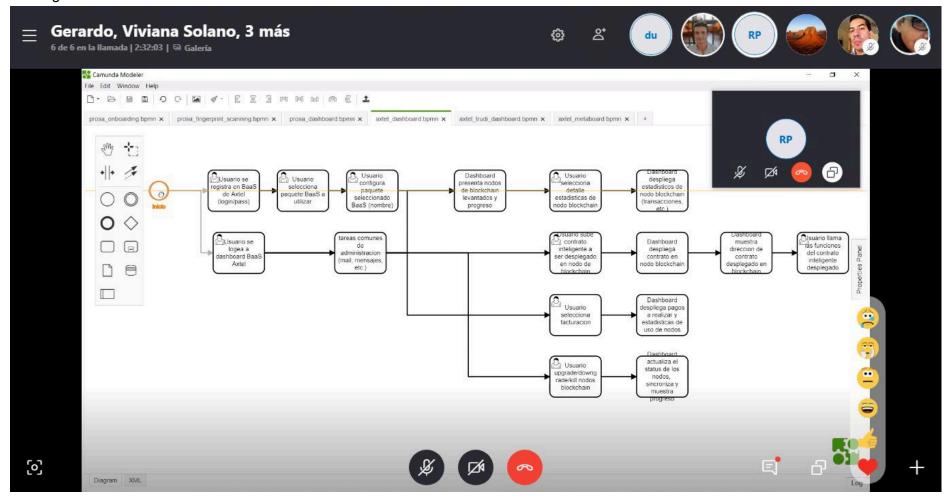

Getting information for the marketing department about the Prosa Users to generate a User profile.

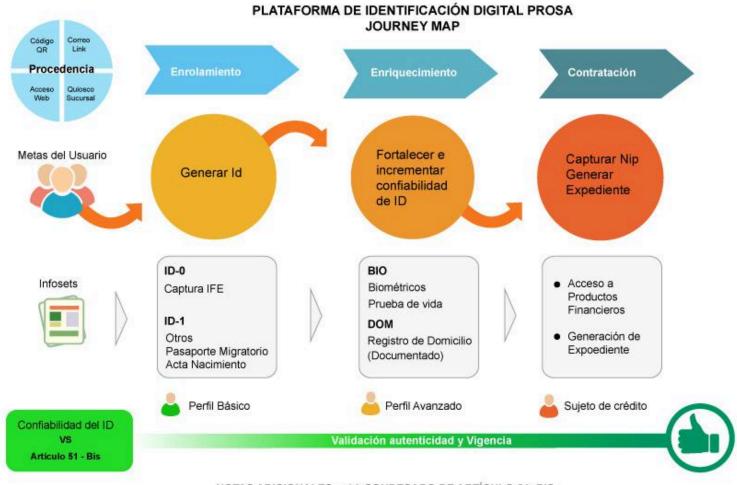

# Analyzing Diagram Process::

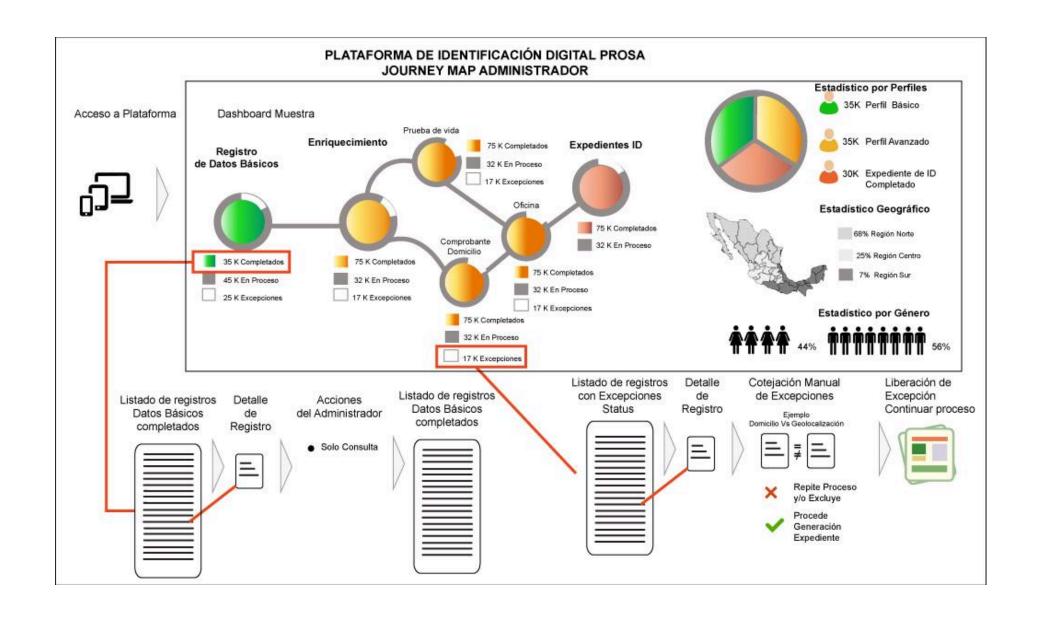

### Meeting with Skateholders:

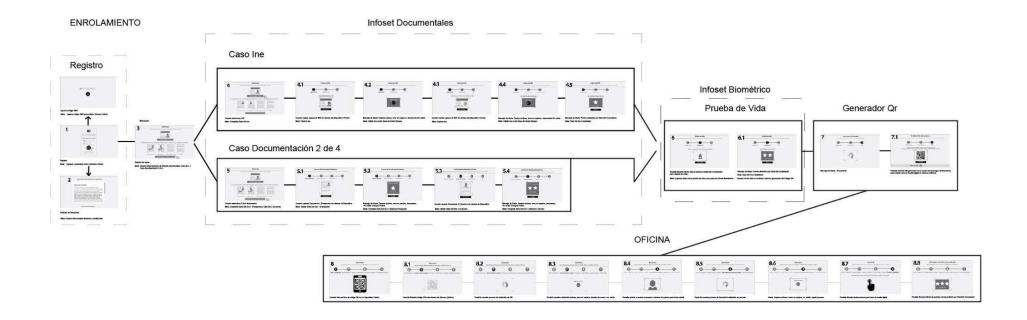

Generation of journey maps and process diagrams.

NOTAS ADICIONALES y / è CONDESADO DE ARTÍCULO 51- BIS

# Final Onboarding process to generate biometric ID
